WHY YOUR NEXT AI LEADER HIRE WILL WASTE THEIR FIRST QUARTER

HOW TO ELIMINATE THE 90-DAY AI TAX

YOU ALREADY MADE THE RIGHT HIRE. HERE'S WHY IT WON'T MATTER.

60–90	3–5	40%
DAYS	**MONTHS**	**STALL RATE**
AVERAGE TIME AN AI HIRE SPENDS ON DISCOVERY BEFORE DELIVERING ANY VALUE	BEFORE EXECUTIVE ALIGNMENT ON AI PRIORITIES TYPICALLY SOLIDIFIES	OF AI INITIATIVES STALL DUE TO MISALIGNED EXPECTATIONS — NOT BAD TECHNOLOGY

WHY

90-DAY BLACK HOLE

- **Org navigation** — Mapping politics & structure from zero
- **Data archaeology** — AI readiness ≠ data warehouse readiness
- **Exec mediation** — Competing visions, no shared definition
- **Governance build** — Policy before product — every time
- **Use case pageant** — Weeks ranking ideas no one validated
- **KPI vacuum** — No metrics = no compass for Day 1

READINESS GAP

Answer honestly. Your new hire finds the truth either way.

1. **Do execs share** one definition of AI success?
2. **Is your data** assessed through an AI-readiness lens?
3. **Can you name** your top 3 use cases ranked by feasibility?
4. **Is an AI governance** framework in place or in progress?
5. **Have you identified** AI champions in each department?
6. **Does your exec team** agree on how AI success is measured?
